

BPA Transmission Business Line Fiscal Year 2003 Non-Construction Alternatives Targets

Conservation, demand-side management and other Energy Web measures are fully integrated into transmission planning for both network and area service needs to ensure least-cost solutions.

Measure – A non-transmission alternatives initiative is implemented which includes the following:

- Implement a Demand Exchange Program on the Olympic Peninsula by January 2003.
- Establish an external Round Table by January 2003.
- Transmission Business Line provides BPA's Energy Efficiency group with the criteria and information for use in testing Distributed Energy Resources as a tool in non-transmission alternatives by January 2003.
- Identify and develop a plan to address institutional barriers to implementing non-transmission alternatives by September 2003.
- Detailed non-transmission alternative reviews for three projects are completed by September 2003 (using the Kangley-Echo Lake analysis as a starting point).
- Screening criteria are developed, based on the three project reviews, and are critiqued by the Round Table by September 2003.

- *These targets require Round Table activity or involvement.*
